Dear Mr. Hamilton:

We have received notification from our patent attorney, Patricia M. Costanzo, that she has sent our wish to discontinue prosecution for our application for COPING JIG. Based upon patent attorney, Patricia M. Costanzo's professional opinion and her search, she determined our invention is entirely different from Goodwin's and strongly believes that our idea is patentable.

For your information we are sending to you the letter which we have received from her. We would greatly appreciate you to peruse the letter and provide your comments on this matter.

We look forward to hearing from you and appreciate your attention to this matter. Should you have any questions, we can be reached via telephone at (716) 894-6466.

Sincerely,

Antoni Zawadzki & Jeffrey Mercuri

RE: Acknowledging Wish to Abandon Prosecution
Invention: COPING JIG
Application No. 10/720497
Filing Date: November 24, 2003
Our Reference: ZawadzkiA_P_1_03

Dear Mr. Zawadzki and Mr. Mercuri:

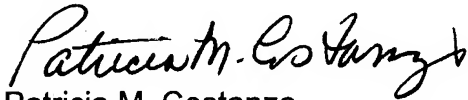

I hereby acknowledge your wish to discontinue prosecution of the above identified application for patent.

Included in this mailing is a copy of the Request for Withdrawal as Attorney Form that I am filing with the United States Patent and Trademark Office (USPTO) to formally withdraw me as your attorney.

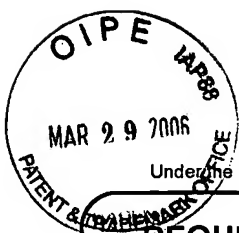

As I explained to you over the telephone, I do not agree with you that the Examiner has made a valid case against the patentability of your invention. There are many examples of how the structure of your device differs from that of Goodwin's, for example your device is simple to make in that it may be made by injection molding, requiring only a few uncomplicated and light-weight pieces as compared to many complex pieces required by the Goodwin device. This alone makes your device easy to use, easy to transport, and extremely affordable as compared to the Goodwin device. Perhaps the most important structural difference is that your device is designed to be used alternatively, without any change to the structure or without the need for any additional parts, with a reciprocating or a non-reciprocating cutting means. Goodwin's

device cannot work with a reciprocating cutting means, that is it would not be possible to use a flat blade cutting means in Goodwin's machine because a flat edged cutting means, such as a saw blade could not move in an x-y direction, such as it would have to in Goodwin's device. Goodwin's machine can only work with a rotating cutting means. Thus, it is my opinion that Goodwin's device cannot be used to make a valid rejection argument against your machine.

Very truly yours,

A handwritten signature in black ink, appearing to read "Patricia M. Costanzo". The signature is fluid and cursive, with the first name "Patricia" being the most prominent part.
